*Allowable Subject Matter*

1. Claims 3-5, 9-12 and 19-31 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The present invention teaches a computer system that has an on-screen keyboard generation division for displaying an on-screen keyboard having a predetermined key layout on a touch panel. Each independent claim identifies the distinct feature of prompting the user to press a predetermined key located in a location that is unique for that predetermined key in a unique key layout of the mechanical keyboard, wherein pressing the predetermined key identifies the unique key layout of the mechanical keyboard, and wherein a same unique key layout is displayed on the touch screen. The closest prior art, Kapp et al. U.S. Patent 5,949,348, teaches a computer system that displays a keypad layout on a touch screen. However, the prior art fails to teach prompting the user to press a predetermined key located in a location that is unique for that predetermined key in a unique key layout of the mechanical keyboard, wherein pressing the predetermined key identifies the unique key layout of the mechanical keyboard, and wherein a same unique key layout is displayed on the touch screen, and thus fails to anticipate or render the above limitations obvious.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
